You don't have to sacrifice growth to enjoy protection

There are many challenges to be navigated in retirement – a volatile market, low interest rates and longer life expectancies. Since no one can predict the future – or the market – it's important to have an investment and retirement plan that accounts for market ups ... and downs.

In a recent study, 75% of investors said it's important for people over 50 to have a strategy to protect portfolios against loss.

Add more certainty to your retirement savings with *Lincoln OptiBlend*[®] fixed indexed annuity

Upside growth potential
In addition to a guaranteed fixed interest rate, your account has the potential to be credited with positive index performance.

The power of downside protection
Your account will never be credited less than 0% – even in a down market.* So, your hard-earned savings are protected.

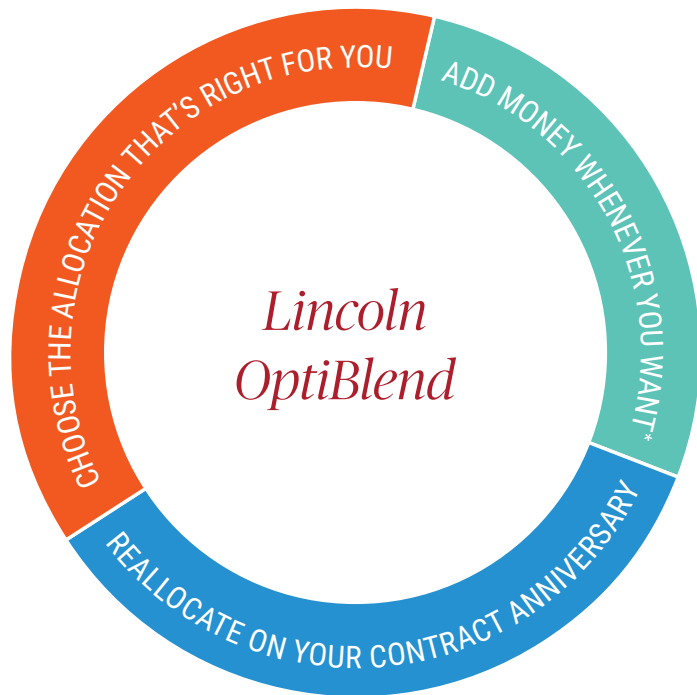

Control your costs*
There are no explicit product charges for seven of the eight account options available with *Lincoln OptiBlend*.

*If allocated to the BlackRock Dynamic Allocation Participation Plus account, the 1% annual fee will be deducted regardless of index performance.

Flexibility to help build your future

One of the unique advantages of *Lincoln OptiBlend*[®] is the flexibility it offers to adapt to your needs and goals. You can allocate your money between eight different account options, with the ability to reallocate every year on your contract anniversary. And whether your retirement is years away or just around the corner, you'll be able to add money anytime you want.¹ By adding more money, you'll have the opportunity to accelerate your account growth throughout your journey. Flexibility empowers you to:

Account options you can feel confident with

On the next two pages, we'll take a closer look at how each interest crediting strategy works, as well as the indices that are tracked. And with each account, don't forget:

Gains from any previous periods will remain intact!

Your principal is always 100% protected from market loss.²

¹ You can add up to \$25,000 each contract year (minimum \$50) and a maximum of \$100,000 for cumulative additional premiums.

² If allocated to the BlackRock Dynamic Allocation Participation Plus account, the fee will be deducted regardless of index performance.

Additional benefits you can count on

10% free withdrawals

Beginning in the first year, you can take a free withdrawal of up to 10% of your account value. If you want more than 10% during the surrender charge period, you may have an additional cost and Market Value Adjustment (MVA), which is a positive or negative adjustment based on the current interest rate environment at the time of the withdrawal.¹

Income to meet your needs²

You can receive income for life or for a period of time by choosing from several options available to you.

Access for medical needs

If you have a qualifying medical need, *Lincoln OptiBlend*[®] has a nursing home and terminal illness provision that allows you to access your money without charge, after the first contract year.³

A death benefit for your loved ones

Before your contract is annuitized, any remaining account value will pass to your beneficiaries.

¹The MVA does not apply to withdrawals after the surrender charge period, 10% free withdrawals, the death benefit, annuitization or contracts issued in select states. In California there is no Market Value Adjustment and the surrender charges are different.

²Annuitization can occur after the fifth contract year or after the first for Florida. Once income streams are started, it cannot be stopped. Withdrawals (including amounts paid as a death benefit) and any charges are deducted first from the Fixed Account. Money taken from the Fixed Account will reduce the actual amount of interest credited. After the Fixed Account is exhausted, withdrawals (including amounts paid as a death benefit) and any charges are deducted proportionally from the indexed interest accounts. Money taken from an indexed interest account will not receive any indexed interest for that indexed term.

³Nursing home rider not available for contracts issued in Massachusetts.

A fixed indexed annuity is intended for retirement or other long-term needs. It is intended for a person who has sufficient cash or other liquid assets for living expenses and other unexpected emergencies, such as medical expenses. A fixed indexed annuity is not a registered security or stock market investment and does not directly participate in any stock or equity investments, or index.

Lincoln OptiBlend® fixed indexed annuities (contract form ICC1515-619 and state variations) are issued by The Lincoln National Life Insurance Company, Fort Wayne, IN, and distributed by Lincoln Financial Distributors, Inc., a broker-dealer. **The Lincoln National Life Insurance Company does not solicit business in the state of New York, nor is it authorized to do so. Contractual obligations are subject to the claims-paying ability of The Lincoln National Life Insurance Company.**

Waiver of Surrender Charges for Nursing Home Confinement Rider and Waiver of Surrender Charges for Terminal Illness Rider (AE-119 (Rev 11/13) and form AE-170 (Rev 10/07), respectively, and state variations) may not be available in all states. Nursing Home Rider not available for contracts issued in Massachusetts. The exact terms of the annuity are contained in the contracts and any attached riders, endorsements and amendments, which will control the issuing company's contractual obligations. For more information about the annuity, please also read the Disclosure Statement and Fact Sheet, or contact your representative.

Income taxes are due upon withdrawal and if withdrawn before age 59½, an additional 10% federal tax may apply. Withdrawals and surrenders may be subject to surrender charges and a Market Value Adjustment.

There is no additional tax-deferral benefit for contracts purchased in an IRA, since they are already afforded tax-deferred status.

The Fidelity AIM® Dividend Index inception was 7/31/19. Returns prior to inception represent hypothetical preinception index performance (PIP), and returns for time frames after this date reflect actual index performance. PIP is based on criteria applied retroactively with the benefit of hindsight and knowledge of factors that may have positively affected performance. Actual performance of the index may vary significantly from PIP data. The level of the Fidelity AIM® Dividend Index is calculated on an excess return basis (net of a notional financing cost) and reflects the daily deduction of a fee of 0.50% per annum. The fee is not related to the annuity.
