SOLVING THE MEDICARE PUZZLE

YOUR MEDICARE COVERAGE

If you're new to Medicare, not all plans have the same benefits and out-of-pocket costs. By comparing all your options, you could find a plan that offers you better coverage, saves money, or both. Review your current plan, costs, and health needs with me.

Medicare Plans

Families often struggle to understand how to navigate Medicare on their own. Comparing plans on your own can be confusing. Each plan has its own purpose and benefit. Do you need a Medicare Supplement? What is the difference between Medicare Part A, B, C, and D? For each answer, there are more questions. Educating yourself about Medicare is important. If you have become eligible for Medicare or are about to become eligible, or would like to review your current plan choices, I can help you put the pieces together.

WHO IS GENERALLY ELIGIBLE?

- People turning 65
- People under age 65 who have qualifying disabilities or conditions
